List of Contents

NUMBER 1

A.K. Prinja 1 Obituary

G.H. Cavalcanti, F.R.T. Luna and **A.G. Trigueiros** 5 Weighted oscillator strengths and lifetimes for the Si X spectrum

W. Pei and **T. Chang** 15 Improved calculation for ion configuration distribution from the average-atom model

A.A. Vigasin 25 Water vapor continuous absorption in various mixtures: possible role of weakly bound complexes

E.V. Sarandaev, O.A. Konovalova and **M.Kh. Salakhov** 41 Regularities in the stark parameters of spectral lines of neutral magnesium

G. Birnbaum, A. Buechele, T. Jiang, G.S. Orton, Z. Hadzibabic and **G.R. John** 47 Absorption in the troughs of the far infrared spectra of NH_3 and mixtures of NH_3 and H_2

B.A. Osborne, G. Marston, L. Kaminski, N. C. Jones, J.M. Gingell, N. Mason, I.C. Walker, J. Delwiche and **M.-J. Hubin-Franskin** 67 Vacuum ultraviolet spectrum of dinitrogen pentoxide

(*Notes*)

W.W. Szymanski, T. Ciach, A. Podgorski and **L. Gradon** 75 Optimized response characteristics of an optical particle spectrometer for size measurement of aerosols

G. Moreau, J. Boissoles, C. Boulet, R.H. Tipping and **Q. Ma** 87 Theoretical study of the collision-induced fundamental absorption spectra of O_2–O_2 pairs for temperatures between 193 and 273 K

NUMBER 2

C.E. Siewert 109 A concise and accurate solution to Chandrasekhar's basic problem in radiative transfer

D.M. Stam, J.F. De Haan, J.W. Hovenier and **P. Stammes** 131 A fast method for simulating observations of polarized light emerging from the atmosphere applied to the oxygen-A band

0022-4073/99/$ - see front matter © 1999 Published by Elsevier Science Ltd. All rights reserved.

H.C. van de Hulst 151 Reciprocity relations in radiative transfer by spherical clouds

(*Notes*)

W.J.J. Knibbe, J.F. de Haan, J.W. Hovenier, D.M. Stam, R.B.A. Koelemeijer and **P. Stammes** 173 Deriving terrestrial cloud top pressure from photo-polarimetry of reflected light

K. Muinonen and **K. Saarinen** 201 Ray optics approximation for Gaussian random cylinders

NUMBER 3

L.B. Barichello, R.D.M. Garcia and **C.E. Siewert** 219 Particular solutions for the discrete-ordinates method

C.E. Siewert 227 A discrete-ordinates solution for radiative-transfer models that include polarization effects

C.E. Siewert 255 A discrete-ordinates solution for multigroup transport theory with upscattering

M. Sakami and **A. Charette** 275 Application of a modified discrete ordinates method to two-dimensional enclosures of irregular geometry

V. Goutiere, F. Liu and **A. Charette** 299 An assessment of real-gas modelling in 2D enclosures

NUMBER 4

S.K. Sharma and **A.K. Roy** 327 New approximate phase functions: test for nonspherical particles

T. Sghaier, M.S. Sifaoui and **A. Soufiani** 339 Study of radiation in spherical media using discrete ordinates method associated with the finite Legendre transform

A. Escarguel, B. Ferhat, A. Lesage and **J. Richou** 353 A single laser spark in aqueous medium

R.S. Pope, P.J. Wolf and **G.P. Perram** 363 Collision broadening of rotational transitions in the O_2A band by molecular perturbers

O.J. Kim and **T.H. Song** 379 Data base of WSGGM-based spectral model for radiation properties of combustion products

L. Linhua, T. Heping and **Y. Qizheng** 395 Inverse radiation problem in one-dimensional semi-transparent plane-parallel media with opaque and specularly reflecting boundaries

B. Su 409 More on boundary conditions for differential approximations

(*Product review*)
H.C. Pumphrey and **S. Bühler** 421 Instrumental and spectral parameters: their effect on and measurement by microwave limb sounding of the atmosphere

NUMBER 5

R.R. Gamache and **R. Lynch** 439 Argon-induced halfwidths and line shifts of water vapor transitions

E.A. Ustinov 457 A variational approach for computing weighting functions for remote sensing of the atmosphere in the thermal microwave spectral region

S.-L. Cheah, Y.-P. Lee and **J.F. Ogilvie** 467 Wavenumbers, strengths, widths and shifts with pressure of lines in four bands of gaseous $^{16}O_2$ in the systems $a^1\Delta_g - X^3\Sigma_g^-$ and $b^1\Sigma_g^+ - X^3\Sigma_g^-$

D.M. O'Brien and **A.C. Dilley** 483 Infrared cooling of the atmosphere: accuracy of correlated k-distributions

C. Sendra and **M.A. Box** 499 Retrieval of the phase function and scattering optical thickness of aerosols: a radiative perturbation theory application

E.S. Chalhoub and **R.D.M. Garcia** 517 The equivalence between two techniques of angular interpolation for the discrete-ordinates method

C.-Y. Wu 537 Propagation of scattered radiation in a participating planar medium with pulse irradiation

NUMBER 6

J. Bauche, C. Bauche-Arnoult, A. Bachelier, P. Palmeri, K.B. Fournier and **W.H. Goldstein** 549 Interpretation of atomic transition arrays generated by far-configuration interaction

G.M. Petrov, V. Gencheva, R. Djulgerova and **V. Mihailov** 563 Time-dependent description of $N_2(B^3\Pi_g–C^3\Pi_u)$ optogalvanic effect in a hollow cathode discharge

M.S. Wooldridge, S.A. Danczyk and **J. Wu** 573 Quantitative evaluation of vibrational excitation of SiO $A^1\Pi–X^1\Sigma^+$ flame emission from a silane/hydrogen/oxygen/argon diffusion flame

S. Yang, P. Ricchiazzi and **C. Gautier** 585 Modified correlated k-distribution methods for remote sensing applications

K.R. Karim and **L. Logan** 609 Calculation of dielectronic recombination rate coefficients for hydrogen-like titanium, chromium, and nickel

G.L. Olson, L.H. Auer and **M.L. Hall** 619 Diffusion, P_1, and other approximate forms of radiation transport

D. Schinköth, M. Kock and E. Schulz-Gulde 635 Experimental stark broadening parameters for near-infrared Ar I and Kr I lines

T. Wujec 645 Transition probabilities for Br II lines emitted from a wall-stabilized cascade arc

(Note)

V. Nagali, D.F. Davidson and R.K. Hanson 651 Measurements of temperature-dependent argon-broadened half-widths of H_2O transitions in the 7117 cm^{-1} region

(Discussion)

I.S. Altman 657 Some critical notes to the paper by W.K. McGregor "On the radiation from small particles"

(Errata)
